

★ Pharmacology ★

classmate

Date

Page

* General Pharmacology :-

- Factors affecting Bioavailability.
- Route of Administration, Advantages & Disadvantages of Parenteral route.
- Competitive Antagonist.
- Phase of Clinical Trial.
- Factors affecting Drug Action - genetics, gender & Age → explain in Detail.
- TDM.
- New Drug Delivery System.
- GPCR
- Drug Dependence
- Volume of Distribution.
- $t_{1/2}$.
- Management of Anaphylactic Shock.
- Describe type of Antagonism with examples.
- PPB
- First Pass Metabolism.
- Therapeutic Drug Monitoring.
- Clinical Status of Prodrug in Disease.
- Pharmacovigilance.
- Agent causing Allergic Reaction & Drug induced Anaphylaxis & its Reaction.
- Define (R) & (R) Regulating gene expression.
- Define Biotransformation & Enzyme Induction & Inhibition with examples
- Adverse Drug effects.
- Teratogenicity
- Drug Tolerance
- Therapeutic Index
- Zero order Kinetics

- Amphetamine in Hypokinetic Patients
- MOA and ADR of Pilocarpine in glaucoma

* ANS :-

- Adrenaline - Local Anaesthetic
- Non-depolarizing SMR
- Classify Sympatholytics, Use & S/E & CI of Metoprolol.
- Detail of Open Angle glaucoma.
- Physiological Basis of Pseudoexfoliation in OP Poisoning.
- Adrenaline in Anaphylactic Shock.
- Oral Therapy of OP Poisoning.
- Non-cardiovascular use of β #.
- Classify Adrenergic Drug, Receptor Mediated Use & MOA of Adrenaline.
- Brimonidine in Open Angle glaucoma.
- Atropine in OP-Poisoning.
- Timolol in glaucoma.
- Brimonidine - T/t in Open Angle glaucoma
- Classify α -Blocker + general effects & Use
- Mydriatics
- Cardioselective β -Blockers.
- Tamsulosin
- Use of β -Blocker in Open Angle glaucoma.
- Tatanaprost
- Osmotic Agents
- Treatment of chronic Simple glaucoma.
- Dopamine in cardiogenic shock.
- Anticholinergic & Atropine
- Myasthenia gravis (Neostigmine)
- glaucoma & Drug Therapy of Acute Congestive glaucoma
- β -Blockers Uses & Propranolol
- Atenolol
- α -1 Antagonist
- Physostigmine in Belladonna Poisoning

* Autacoids :-

- Prostaglandin Analogues
- Aspirin in MI
- Fexofenadine
- Sumatriptan
- Allopurinol in gout
- Celecoxib
- Febuxostat
- Prophylaxis of Migraine
- Classify NSAIDs & write Aspirin.
- Gout
- H₂ Antagonist
- 5-HT Receptors & uses of Drugs which ^{act} ^{through} ^{these} Receptors
- Ibuprofen in Pain
- Methotrexate in RA (Aspirin)

* RS :-

- Drug Therapy for Chronic Bronchial Asthma.
- Classify Anti-Asthmatic Drugs, MOA, S/E of Theophylline.
- Mast Cell Stabilizers.
- Inhaled Steroids.
- Leukotriene Antagonist
- Drug Therapy for Status Asthmaticus
- Salbutamol - MOA, S/E, Route & Uses
- Omalizumab
- Drug Therapy of Acute Bronchial Asthma
- Mucolytics
- Expectorants
- Sodium cromoglycate
- Dextamethorphan in Dry Cough
- Ipratropium in Bronchial Asthma

* Endocrine System :-

- Classify Insulin Preparation, Use ; S/E of Insulin.
- Use + Adverse effects of corticosteroid
- HPA axis Suppression
- glucocorticoid in TB
- Bisphosphates
- Estrogen
- Oxytocin
- Oxytocin VS ergometrine
- DPP-4 Inhibitor
- Metformin
- Oral Hypoglycemic Drugs classification, MOA, S/E of Metformin & glipizide
- Selective estrogen Receptor Modulator (SERM)
- Prednisone
- Anti-Thyroid Drugs
- Use, S/E & C/I of glucocorticoid
- Tocolytics
- Anabolic Steroids
- Classify OCP, Describe MOA, S/E of combined OCPs.
- Oral Therapy of Diabetic Ketoacidosis
- P.L Basis of clomiphene citrate in infertility.
- Respirothiuracil
- Emergency Contraception
- Classify Oral Hypoglycemic, Current status of drug in Rx.
- Octreotide
- Radioactive Iodine
- Acromatose

- Classify Anti-Thyroid & write about Thio-amide
- Classify drug for DM, MOA, S/E of Insulin.

* PNS :-

+ Non-Depolarizers

- Centrally Acting Skeletal Muscle Relaxant
- Dantrolene in Malignant Hyperthermia
- Advantages of Local Anesthesia
 - Vecuronium
 - Tignocaine
 - Neostigmine in overdose of Curare

* CNS :-

- Succinyl Co-A Poisoning
- Drug Therapy for status epilepticus
- Classify Local Anaesthetic Agent, MOA, Use & S/E of Tignocaine
- Classify Centrally Acting Skeletal Muscle Relaxants + MOA, Use & S/E of Dantrolene
- Ethyl Alcohol
- Type of epilepsy, Phenytoin - MOA, SE, PK
- Morphine v/s Pethidine
- Oral v/s Parenteral Iron Therapy.

- MOA, Use & S/E of Sch.
- L-Dopa + Carbidopa → Pharm. Basis
- Sodium Valproate
- C/I, MOA of Opioid Analgesics + Morphine
- Classify BZD, MOA, Use & S/E of Diazepam
- Classify Antipsychotic, MOA, S/E of chlorpromazine.
- Haloperidol
- Second gas effect
- Ropinirole
- Morphine Poisoning
- MOA, S/E & Uses of Haloperidol
- Classification - Parkinsonism Drug, Levodopa
- Dantrolene in Malignant Hyperthermia.
- Classify Antiepileptic drug - Valproic Acid
- SSRIs
- Pure Opioid Antagonist
- Atypical Antipsychotic
- Bromocriptine V/S
- Fentanyl
- Lamotrigine
- Flumazenil in BZD Poisoning.
- Mivacurium
- Dissociative Anesthesia

* CVS :

- ◉ CCB
 - Classify Drugs for CHF, Digoxin - MOA, Use, S/E
- ◉ Losartan
 - Hydrochlorothiazide in HTN
 - Compare & Contrast Captopril & Losartan.
- ◉ Pharmacological Therapy of MI
 - Amlodipine, glyceryl Trinitrate
 - Captopril - Use, S/E, MOA
- ◉ S/E of ACE-I + Use / Drug Treatment for Chronic Angina
 - Management of Pregnancy induced HTN
 - Digoxin for Acute LVF
- ◉ Compare & Contrast Verapamil & Nifedipine
 - Classify Anti-HTN, MOA, Use & S/E of Nifedipine
 - Enalapril, Nitroglycerine, Losartan in HTN
 - CCB - Use, MOA, S/E
 - Treatment of Acute LVF
- ◉ Clopidogrel
 - Digitalis in Atrial Flutter
 - Nitrate in Cyanide Poisoning
- ◉ Plasma expander
- ◉ Classify Antianginal - MOA, Use, S/E of Propranolol.
 - Adenosine, Diltiazem
- ◉ Drugs which Prolong QT Interval
- ◉ Use of Adenosine in PSVT

* Kidney :-

- ⊙ Complications of High ceiling Diuretics & Thiazide.
- Classify Diuretics
- High Ceiling Diuretics
- ⊙ Osmotic Diuretic + Mannitol in cerebral edema
- Physiology of Urine Formation
- Use, S/E of Furosemide
- K^+ Sparing Diuretics
- ⊙ Compare & Contrast Furosemide & Acetazolamide

* Blood :-

- ⊙ Compare & Contrast Heparin & Warfarin
- Classify Anti-coagulants
- ⊙ Warfarin
- ⊙ Oral v/s Parenteral Iron Therapy
- Statins
- Fibrinolytics, Alteplase
- ⊙ Selegiline
- $FeSO_4$
- ⊙ Rosuvastatin
- ⊙ Vitamin B₁₂
- ⊙ Clopidogrel - MOA, S/E & uses

- Classify Antiplatelet
- Iron Dextran
- Parenteral Iron Therapy
- MOA of Oral Anticoagulants
- Dep. v/s LMWH
- Classify Heparin - MOA, S/E, Use
- Local Haemostatic Agent
- Erythropoietin
- Streptokinase
- Cardioprotective effect of Statin

* GIT :-

- Classify Antiulcer Drugs, Salient Features of PPI
- ORS
- $Al(OH)_3$
- Antiemetic classification, Metoclopramide
- Omeprazole
- Anti-H. Pylori Rx
- Anti-H. Pylori Drugs
- Bulk Forming Laxative
- Pathophysiology of emesis, Write Salient Features of Drug affecting it
- Antimicrobials in diarrhea
- Peptic Ulcer Drug - Ranitidine
- C/I, Use & choice of Purgatives
- Compare & contrast - Metoclopramide & Domperidone

* Antimicrobial Drugs :

- Compare & Contrast - Pen. G & Amoxicillin
- Cotrimoxazole
- β - Lactamase Inhibitor
- Anti H-Pylori Drug
- Use, S/E of Tetracycline
- Classify Cephalosporins, Use, S/E of 3rd generation.
- Protease Inhibitors
- Classify Anti-retroviral Drug & Therapy for HIV Infection
- Doxycycline
- Metronidazole
- HAART
- Tigecycline
- Vancomycin
- ACT
- Gentamycin
- Meropenem
- Isoniazide
- Sirolimus
- Rx of Category - I TB
- Rx of Category - II TB
- Classify Macrolide - MOA, Use, S/E of Erythromycin

- Integrase Inhibitors
- Classify Aminoglycoside - MOA, S/E, (Post-exposure)
- Prophylaxis of HIV
- Amphotericin - B
- Jexxa Reaction
- Fluoroquinolone
- Mefloquine
- Classify Antimalarial Drugs & Oral Therapy of Cerebral Malaria
- Albendazole
- Rifampicine
- Dapsone
- Factors affecting Selection of AMA
- Classify Anti-TB Drug, Define various category of Patient & write about Category choice of Antimicrobial Agents
- Artemether + Lumefantrine Combination
- Remdesivir
- PT of MB, Avium complex Infection
